

Glossary

I have found that some individuals at Litton PRC and in many of the organizations with which I have consulted become stymied and unable to continue making progress when they come across words with which they are not familiar and can't easily determine their definition. I have compiled a list of definitions in writing this book. The artifact provided in this folder may be extremely useful to you and your organization. Consider tailoring it by adding definitions of words unique to your environment, and omitting definitions that are not used in your environment. There is added cost and schedule associated with creating artifacts and assets anew. I encourage you to reuse artifacts whenever you can.
